Vision:

SREMSC is a devoted team working for all the people of EMS, helping them provide the best in patient care, integrating them into the health care team, and insuring their commitment and value are recognized. We promote growth and development of community EMS. We promote excellence in patient care, quality management, injury prevention, and professionalism. We value the volunteer and paid providers of emergency care.

We advocate always for EMS.

Philosophies:

We promote excellence in Emergency Medical Service throughout our Region by fostering self-sustaining EMS organizations that place their trust in us and look to us for guidance. We provide information on new technologies, changing standards and the most up-to-date EMS practices. We enhance patient care through the highest quality instruction, continuing education, quality assurance programs, and training in management principles.

We encourage EMS personnel to become involved in regional, state and national organizations. We work together to further EMS, participate in its growth, and develop its standards.

We provide instructor training and resources to promote each community's independence, and where resources are limited, we assist communities through other means.
